

Boral **Roofing**  
Build something great™

# FLORIDA

CONCRETE ROOF TILE COLLECTIONS

# Our Florida Legacy.

We have proudly served the Florida market for over 30 years. Florida is home to legacy employees who have shaped the way we do business today. Our strong culture and commitment define the quality behind every tile.

Jorge Sanchez, Yard Loader, 10 years  
Thomas Arzu, Product Manager, 10 years  
Adrian Cooper, Technical Manager, 23 years

Linda Turner, Shipping Coordinator, 31 years  
Donna Baldwin, Director of E-Commerce & Supply Chain, 32 years  
Mark Arredondo, Mechanic, 33 years

# The Mastery of Manufacturing

We focus on the latest innovations in tile manufacturing. Our process is unique, providing pre-blended tile for the best roof aesthetic. With locations in Lake Wales and Pompano Beach we continue to maintain our commitment to our Florida customers.

Asphalt Shingle  
**139°**  
attic temperature

Concrete Tile  
**94°**  
attic temperature

# Why Tile?

**NATURAL PROTECTION**  
Attic temperatures measured using identical heat sources simulating the sun's radiation comparing standard Boral concrete roof tile to a common asphalt shingle. The result is less heat in the attic and lower energy bills.

# Material Matters.

## **BEAUTY MATTERS**

Our concrete tiles have texture and substance, creating a true multidimensional look for your roof. Their natural colorways harmonize easily with other exterior building elements.

## **DURABILITY MATTERS**

Boral engineered tile is specifically designed for new build and reroof, helping provide Floridians protection from the elements.

## **VALUE MATTERS**

Boral stands behind the quality of our roof tile with a Fully Transferable, Non-Prorated Limited Lifetime Warranty.

## **SUSTAINABILITY MATTERS**

Boral roof tile is locally made and sourced in Florida since 1958.

# Color Matters.

As the market leader, we strive to enhance the curb appeal of your home. We continuously develop new colors to harmonize with the shifting architectural trends in Florida. We take pride in the color quality and blending we provide.

# 3 STYLES

Florida Boral concrete roof tile easily harmonizes with all 3 dominant architectural styles.

## TRADITIONAL

American adaptations of regional home styles from other time periods or areas of the world. Often mixed references.

MEDITERRANEAN  
TUSCAN  
WEST INDIES  
FLORIDA OLD STYLE  
FRENCH COUNTRY

## TRANSITIONAL

Prefers the clean lines of contemporary architecture, but draws heavily on details and styles from traditional architecture.

RANCH / SPLIT LEVEL  
PRAIRIE STYLE  
MIXED LOOKS

## CONTEMPORARY

Characterized by a preference for clean lines, open concepts, decoration, ample light sources, large windows, and lack of round forms.

MODERN  
MID-CENTURY  
MODERN

## HIGH & MEDIUM TILE PROFILE COLLECTIONS

### Barcelona 900

This modern interpretation of old world Spanish design creates a distinctive mission tile appearance.

P. 17

### Boosted Barcelona Caps

Available installation application of Barcelona 900 which creates the appearance of an authentic mortar-boosted tile.

P. 23

### Villa 900

Emulates beautiful Mediterranean styles found in Italy and Southern France.

P. 25

### DESIGNER PRODUCT

### Spanish "S" Nuevo

This modern interpretation of old world Spanish design creates a distinctive mission tile appearance.

Made to Order in Lake Wales and Pompano  
25% Eldorado Antique; 25% Cactus Antique  
25% Desert Antique; 25% Dunes Tan Antique.

<sup>1</sup>When ordering a custom color blend, each color must be ordered separately in half or full pallet quantities. Boral Roofing does not pre-blend custom blends at the factory. In order to avoid any possible unwanted color patterning during the installation, the skilled installer should periodically view the roof from the ground level at a distance of about 50 feet. This procedure will help ensure the desired random look, help avoid "hot spots", checker boarding, streaks or stair stepping. Acceptable blending can only be done during the installation process.

# BoralRoof.com - Imagine the Possibilities

### Visualize

Picture your new roof with Boral Roofing's Inspiration house photo gallery on our website.

### Order A Sample

Deciding on the perfect roof can be overwhelming. So, instead of wondering what color or style will work, order a sample and take the guesswork out of your decision. It's just another way Boral Roofing makes it easy to buy with confidence.

### Architectural Tools

Our complete suite of architectural tools, including Arcat 3-Part Specs and CAD/BIM drawings, are available for download directly from our website.

### Online Ordering

Manage your orders through My Boral, a simple online tool to track product orders in real time, all from the convenience of your computer, tablet or smartphone. Sign-up for e-mail alerts to notify you of your order status.

### Limited Lifetime Warranty

As a brand you can trust, Boral Roofing offers one of the most comprehensive, fully transferable roofing warranties available on the market today.

**Code Approval:** Complies with all building codes including but not limited to ICC ESR-1647. Some approvals are regional and only apply to locally produced products; please contact Boral Roofing before transporting product across state lines. Specifically, products used in the Miami Dade County region of Florida require special testing and recognition. All files are Class A fire rated.

**Disclaimer:** The printed colors shown in this brochure may vary from actual available tile colors. Before making a final selection, be sure to review actual tile samples and roof installations. Please contact your local sales office for further assistance. Inadvertent errors in this publication are subject to change without notice. No performance guarantee is offered or implied beyond that expressly indicated.

Efflorescence is a temporary surface condition which is common to all concrete products. The process is caused by the chemical nature of cement. This reaction can appear as an overall chalky white bloom (a softening of color) or in more concentrated patches. It is difficult to predict how long the effects of efflorescence will last. It depends on the type and amount of deposit as well as local weather conditions. The action of carbon dioxide and rainwater will gradually remove the deposit, in most cases, leaving the original color of the roof intact without further efflorescence occurring. It is superficial and in no way affects the quality or functional properties of the tile.

**Installation:** According to the Tile Roofing Institute loading guidelines, "To achieve a pleasant, random blend of color for your job, care should be taken upon loading to mix the tiles." (Source: 2015 Clay and Concrete Roof Tile Installation Manual). Please consult the Tile Roofing Institute (TRI) Installation guides for application recommendations.
