

A QUIET SUBFLOOR MEANS EVERYONE ELSE CAN SLEEP IN

KEEP THE PEACE, STOP THE SQUEAKS.

Squeaky floors can be a rude awakening. Keep the peace with the strength and stiffness of AdvanTech® subflooring combined with the innovative AdvanTech™ subfloor adhesive. The result is subflooring so strong it protects floors against squeaky, bouncy floors in your new home, so everyone else can sleep in – no matter how early your morning starts.

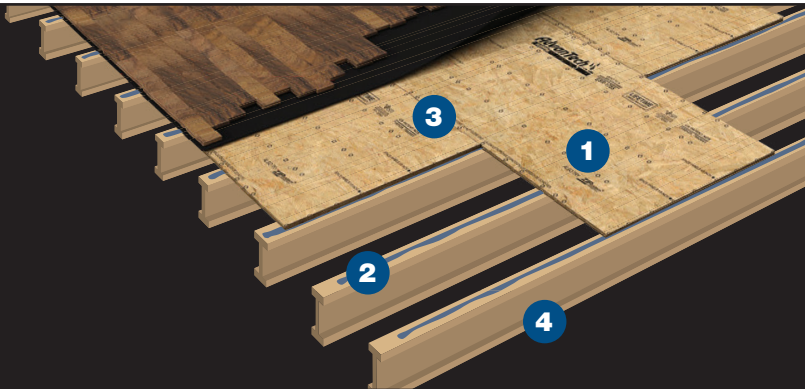

WHAT IS A SUBFLOOR?

Subflooring is the flat base on which your finished floor coverings and everything else in our homes rest.

WHAT DOES A PREMIUM SUBFLOOR SYSTEM MEAN TO YOU?

In short, using AdvanTech® flooring and AdvanTech™ subfloor adhesive means quiet, stiff floors.

We all fantasize about our dream home. We love to imagine friends gathering around the dinner table and kids playing in the living room — everyone enjoying quality time spent in each other's company. Dishes rattling as people walk on bouncy floors, cracked grout, buckled wood floor seams, and squeaky floors should not be part of it. **That is why we build with the powerful combination of AdvanTech subfloor and AdvanTech subfloor adhesive.**

THE ADVANTECH® SUBFLOOR ASSEMBLY

- 1 AdvanTech® subfloor panels
